

Streamlined Third-Party Contract Payments

TouchNet® SponsorPoint™ automates third-party contract payments by connecting students, sponsors, and schools. SponsorPoint replaces paper-based processes with electronic applications. It streamlines reconciliation, automates communications, secures payment transactions, and provides self-service, online account management for both students and sponsors. SponsorPoint offers schools timely payments collected with less effort. Discover TouchNet SponsorPoint – a new solution for automating third-party sponsored agreements, receivables, communications, and payments.

Why SponsorPoint?

► Students

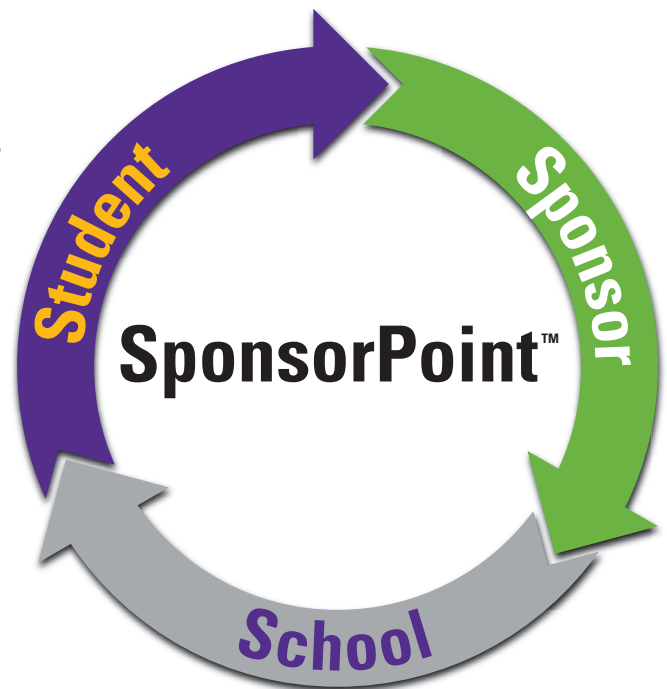

Students eliminate the hassles of getting their tuition payments approved and paid, yet retain control of their billing and payment information.

► Sponsors

Sponsors enjoy self-service access to manage the details of their account, including activity at both contract and student levels. They also get easy, online management of user and payment profiles; flexible payment options, including payment by account, contract, student, or line item details; streamlined workflow; and secure online payments.

► School

SponsorPoint eliminates manual processes and excessive paper handling and replaces them with streamlined reconciliation, electronically captured agreements, and automatic communications. The result is a more efficient business office.

Sponsor Self-service

SponsorPoint provides a comprehensive view for sponsors to see and manage the details of their account, including activity by contract and student level, user access, and payment profiles.

Sponsor Account Management

This self-service option lets sponsors designate additional authorized users to view and pay on specific contract accounts.

Student Authorizations

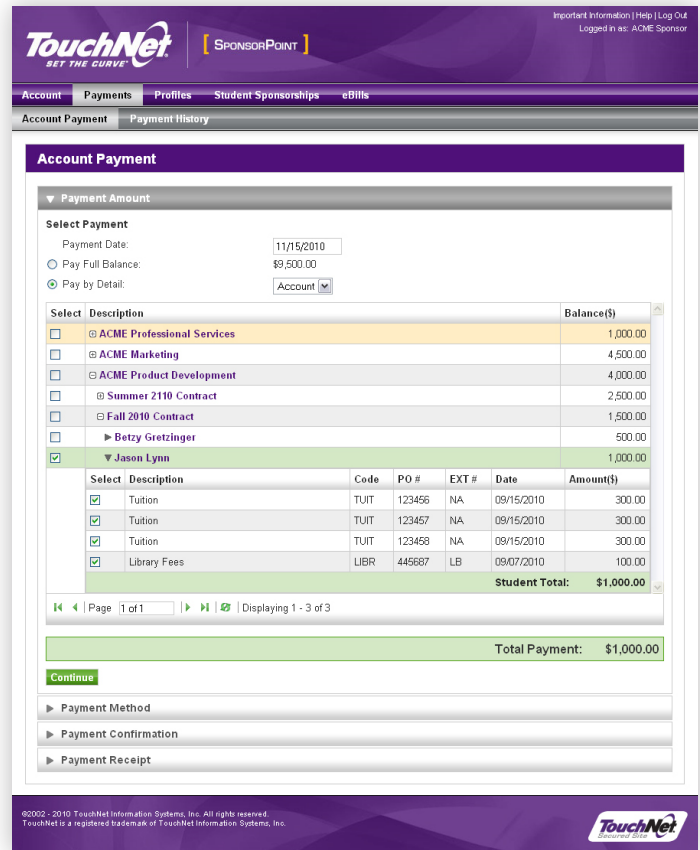

Students both initiate and authorize sponsor access to their account via student self-service on a per-term basis.

Payment Flexibility

Sponsors receive the convenience and flexibility to pay by different criteria, including account, contract, student, or detail, to create a streamlined reconciliation process.

Contract Connections

SponsorPoint streamlines communications between student, sponsor, and school. It makes it easier to capture sponsor agreements and student authorizations and send automated notifications and alerts, all through online self-service entries.

u.commerce™
How money moves on campus.™

TouchNet SponsorPoint is a strategic element of TouchNet U.Commerce—the broadest spectrum of commerce management solutions available to Higher Education today. U.Commerce is everything you need to gain greater control of costs, transactions, compliance, and key constituent relationships. Save money. Make money.
